DETAILED ACTION

The indicated allowability of claims 2, 3 and 9 is withdrawn in view of the newly discovered reference to Petersen et al., U.S. 3,501,173. Rejections based on the newly cited reference follow.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2-10 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Petersen et al., U.S. 3,501,173 in view of Kopecki et al., U.S. 6,710,600.

Regarding claims 2-10 and 12, Petersen et al. discloses boring mechanism having mutually displaceable rods (24', 29), one rod having steel (42',31',38) and fiberglass (30); interlocking members (48,33,35), one being a slot (33). Peterson et al. does not disclose the fiberglass is carbon fiber. Kopecki et al. teaches use of carbon fiber and fiberglass as being well known in the art (col. 2, lines 18-35). It would have been obvious to one having ordinary skill in art at the time of the invention to arrange for the fiberglass rod disclosed by Petersen et al. to be carbon fiber as taught by Kopecki et al. since the use of both is well known to one having ordinary skill in the art and the selection of material being a design choice.
